

47th National Solar Conference & Summit

Call for Participants Open Now Through April 2

Join the Call for Participants today!

Join participants from all disciplines to democratize the conversation about what we need and what we bring to achieve renewable transformation.

Go to our official conference website to review information about the event and more information on the Call for Participation.

ASES SOLAR 2018 Conference & Summit

Building on ASES's successful 2017 Conference, participants will map three **Pathways to Renewables** and commit to the steps we will take:

- Broadening access to renewables to give everyone a choice and a voice;
- Orchestrating new energy systems; increasing solar electrification, efficiency and storage in every sector, from building-energy to transportation,
- Working to maximize renewables for energy resilience, preparedness and recovery from accelerating climate emergencies.

Each of these tracks cut across technical disciplines, educational and political strategies, and home-grown solutions.

ASES is committed to bringing you outstanding keynote speakers, a program with short and long presentations in examining the controversies, technical options and creative solutions for each pathway topic. We are also offering more discussion time for all participants to pose questions and suggestions at every panel and speaking event.

The conference also will feature a breadth of research panels, posters, professional awards, and special events.

Submit an Abstract Today!

We urge you to submit an abstract in March and plan to join us on the beautiful University of Colorado campus in Boulder this summer.

Go to <https://www.ases.org/conference/call-for-participants/> for more information!
