

International Clean Energy Corpstm

Creating a Global Taskforce to Tackle Climate Change

Presented by

John R. Essig, Jr.

Director, Int'l Clean Energy Corps

Chair, Mid Atlantic Solar Energy Society

A chapter of the American Solar Energy Society

John.Essig@CleanEnergyCorps.org

**Renewable Energy Vision
Virtual Conference
June 24-25**

Mission:

Mobilize the Citizens of Planet Earth
to create a truly Sustainable, Resilient,
Peaceful, Prosperous, Enlightened,
Healthy and Just World for All. *

- * **Special Note:** In the wake of the global economic disaster precipitated by the COVID-19 Pandemic, the *International Clean Energy Corps* could also serve as a highly effective vehicle for providing a Guaranteed Job to all who wish to make valuable contributions to present-day society, as well as to future generations (akin to the “*Civilian Conservation Corps*” established during the *Great Depression*).

Strategy – A few key elements:

- **Empower & Deputize Citizens** to assist Gov’t & Industry**
** Governments & Industry can do a lot to combat Climate Change,
but not everything! Success also depends on OUR choices & actions.
“What can WE do for Ourselves, for Our Communities AND for Our Planet?”
- **Establish Globally Accessible*** Education & Training**
*** Need to eliminate all unnecessarily barriers: e.g., prohibitive costs,
schedule conflicts, long distances, language and other barriers, etc.
“Madam University President, Mr. Dean of Students: Please Tear Down These Walls!”
- **Take Direct Community Action** on Projects, Near & Far
- **Collect & Share Best Practices:** “Localize” around Globe
- **Be a Collaborating Org.** – NOT a Competing Org.

Education & Training:

Education
is the most powerful
weapon which you can use
to change the world.

- Nelson Mandela

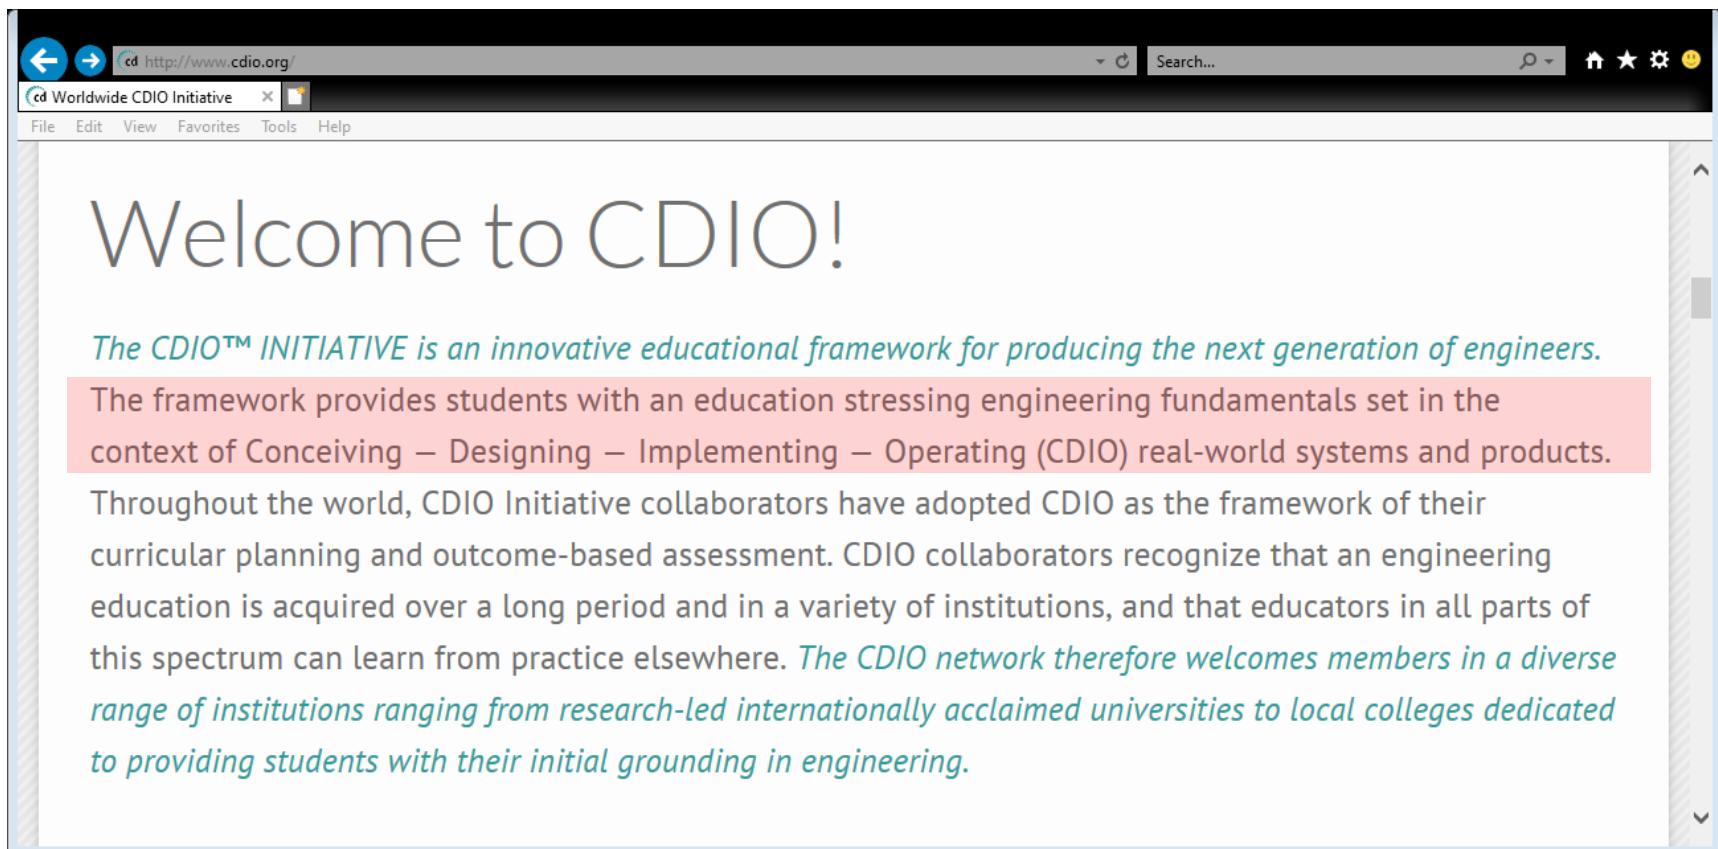

It's also our Best Tool to fight Climate Change...
along with Racism and so many other gross injustices!

Education & Training Programs: (Proposed)

- **Online Classes** hosted by Clean Energy Corps & Partner Orgs.
 - Lowest-cost, easiest way to reach all people, everywhere.
 - Facilitates “localizing” course materials to multiple languages/regions.
- **University Classes & Labs** at collaborating schools (on-site and online)
Key: Earn Academic Credit AND Professional Certification Credentials!
- **Summer Learning Institutes and Semester-Abroad Programs**
- **Hands-on Training** via Partner Training Orgs., Workshops, Internships, Apprenticeships, Seasonal/Part-time/Full-time Jobs, Volunteering, etc.
- **Community Service Projects:** Hands-on Experience Open to All
 - Range of Local to International Projects (*Service-Learning, Service-Travel*, etc.)
 - Like *Habitat for Humanity* and *Doctors w/o Borders*, but for Climate Action.
- **End-to-End Project-Based Learning** (akin to the “CDIO” Initiative)

CDIO Initiative: Conceive - Design - Implement - Operate

A screenshot of a web browser displaying the CDIO.org homepage. The address bar shows 'http://www.cdio.org/'. The page title is 'cd Worldwide CDIO Initiative'. The main heading is 'Welcome to CDIO!'. Below it is a teal-colored text block: 'The CDIO™ INITIATIVE is an innovative educational framework for producing the next generation of engineers. The framework provides students with an education stressing engineering fundamentals set in the context of Conceiving – Designing – Implementing – Operating (CDIO) real-world systems and products.' A larger teal text block follows: 'Throughout the world, CDIO Initiative collaborators have adopted CDIO as the framework of their curricular planning and outcome-based assessment. CDIO collaborators recognize that an engineering education is acquired over a long period and in a variety of institutions, and that educators in all parts of this spectrum can learn from practice elsewhere. The CDIO network therefore welcomes members in a diverse range of institutions ranging from research-led internationally acclaimed universities to local colleges dedicated to providing students with their initial grounding in engineering.'

Welcome to CDIO!

The CDIO™ INITIATIVE is an innovative educational framework for producing the next generation of engineers. The framework provides students with an education stressing engineering fundamentals set in the context of Conceiving – Designing – Implementing – Operating (CDIO) real-world systems and products.

Throughout the world, CDIO Initiative collaborators have adopted CDIO as the framework of their curricular planning and outcome-based assessment. CDIO collaborators recognize that an engineering education is acquired over a long period and in a variety of institutions, and that educators in all parts of this spectrum can learn from practice elsewhere. The CDIO network therefore welcomes members in a diverse range of institutions ranging from research-led internationally acclaimed universities to local colleges dedicated to providing students with their initial grounding in engineering.

- Excellent global model for rigorous ***Project-Based Learning***.
- Concept can be expanded beyond engineering to all disciplines.
- **A solid framework for *Clean Energy Corps* projects, worldwide.**

CDIO Universities: Over 120 Institutions on 6 Continents

- A demonstrated model for sharing “*Best Practices*” worldwide.
- Can do similar global collaboration for Solar/EE/RE education, etc.
- Resource sharing seems vital to Globally Accessible Education.

(To learn more about the CDIO Initiative®, visit www.CDIO.org)

Public Outreach Programs *(just a few examples)*

Socially-Distant Outreach: *(During COVID-19 Pandemic)*

- **Mission-focused Webinar Series** in collaboration with Partner Orgs
- **Virtual Solar Tours** (Homes, Businesses, Schools and other illustrative venues)
- **Digital Newsletters, Topical Guides & Reports, Policy Updates**, etc.
- **Online and Social-Media Campaigns** (for both awareness & fundraising)

===== Upon COVID-19 Vaccine, Effective Therapeutics or Herd Immunity =====

Future Outreach Programs: *(Post COVID-19)*

- **In-person Community Lectures/Speaker Series/Workshops**
- **Public Festivals** in collaboration with Partners (featuring Sustainability Education, Demonstrations, Solar Cooking incl. *Solar Chef* Contests, Solar Art, Music & more)
- **Fun Runs and the like** (e.g., “EarthDay 10Ks”, etc., to raise awareness & funds)
- **Mission-focused Social Events** (e.g., “*Green Drinks*” to build community, raise \$\$)
- **Expanded & Enhanced Physical Solar Tours** (more Countries & Languages)

Popular Community Outreach Programs:

As but one example--

Solar Tours... *where*

*"Neighbors teach Neighbors
how to save Planet Earth!"*

30th year in Washington, DC

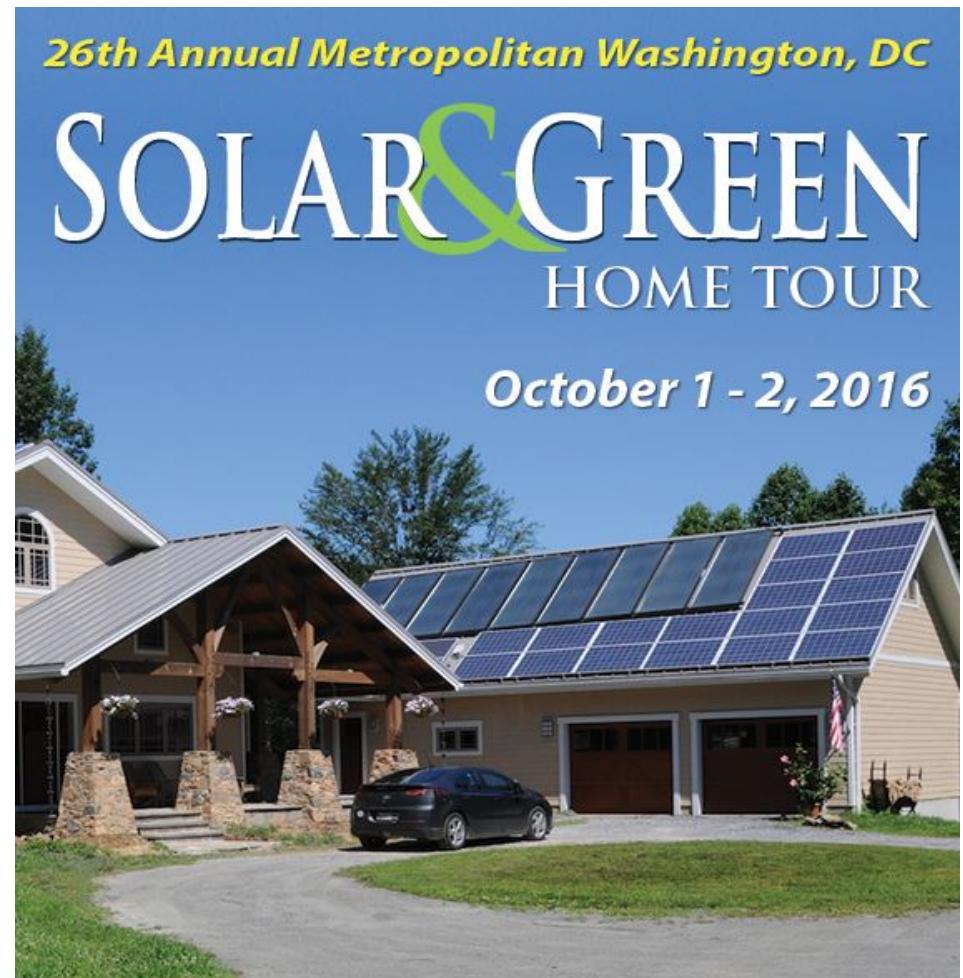

www.SolarTour.org

25th year, Nationally

www.NationalSolarTour.org

And, Coming Soon...

World Solar Tour™

Clean Energy Corps shall help replicate proven models Globally.

Community Action: *(Again, but a few examples)*

Socially-Distant Community Activities: *(During COVID-19)*

- **Community “Energy Census”** (Learn how much EACH of US must reduce)
 - **Expand “Solarize”, “Solar Co-op” & “Community Solar” programs** plus other Neighborhood-Scale & Community-Scale Activities with Partner Orgs.
 - **Community-based Sustainability Competitions & Design Contests** (e.g., Resilient Solar Schools, ZNE Buildings, Zero-emission Vehicles with V2B & V2G, *Parallel Community Microgrids* enabling Community Solar without the Utility Co!)
-

Future Community Activities: *(Post COVID-19)*

- **Support Community Solar Installations** (e.g., on Municipal Facilities: Solar Schools, First-Responder Facilities, Parks, Transport Hubs, etc.)
- **Support Residential/Commercial Solar Installations** (e.g., for Solar Co-ops, Non-profits, Seniors, LMI Households, Disabled Vets, D.I.Y. Groups, etc.)
- **Support Neighborhood Energy-Efficiency Retrofits/Weatherization**

Next Steps... *for Int'l Clean Energy Corps:*

- **Legally establish Int'l Clean Energy Corps** as an independent non-profit org. focused on Climate Change Mitigation, including Education & Outreach, Research in the Public Interest, Social & Environmental Justice, and other community-supportive programs and activities.
- **Formally establish Relationships with key Partner Organizations** -- particularly those with complementary missions and objectives.
- **Secure & Operationalize All Resources** needed to initiate operations (e.g., Business Systems, Facilities, Staff and, of course, Funding, too!)
- **Commence Operations** with the Launch of Key Programs. (TBD)
- **Together, Start building a Global Taskforce needed to Create a truly Sustainable World for ALL!**

Everyone is Welcome! **Everyone is Invited!**

Next Steps... Recommended for All Earthlings

***Make GREEN Choices... and Take GREEN Action...
Everywhere and with Everyone We Can:***

1. Individually
2. Family (*Household & Extended Family*)
3. Friends (*both New & Old, Near & Far*)
4. Colleagues (*Work, School, Community Groups*)
5. Neighbors (*Next Door to Whole Neighborhood*)
6. Broader Community (*Town, City, County, etc.*)
7. State / Province / Territory
8. Nation
9. Continent / Region of the Globe
10. Worldwide

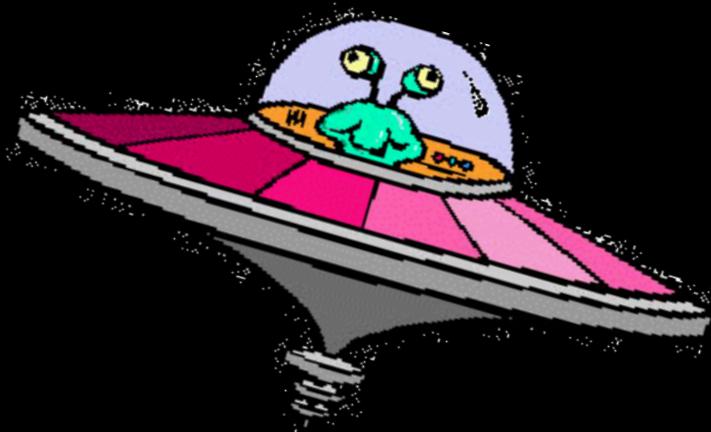

We're here to help every step of the way. Stronger Together

Image courtesy of NASA

One Final Perspective:

*Hey, Earthlings –
You've Got a Great Planet...
... IF You can Keep It!*

Let's NOT mess this One up!

Image courtesy of NASA

On behalf of All Citizens of Planet Earth,

“Thank You!”
